

JOHNSON BED SHAPERS

G-195

The Johnson Bed Shaper is adjustable for width of beds, as well as for depth of furrows. The tool bar standards are adjustable in height. With these adjustments, beds can be shaped to meet the particular requirements of the crop and the field conditions. The shapers can be mounted on 2-1/4" diamond tool bars, 4" square tool bars or 4" x 7" tool bars. (A-Frame and Tool Bar are not included as part of Bed Shapers.) Since the Johnson Bed Shaper is an assembled unit rather than a fabricated unit, it can be moved to different tractors easily. This is a quality unit at an economical price.

2-1/4" Tool Bar Brackets are made to accept two bars. (Not Shown.)

Note the convenient adjustment features on center plate assembly and Pontoon for width of beds as well as depth of furrows.

For Prices, See Numerical Price List On Page G-196

For 20", 22" And 24" Beds
