

Notes

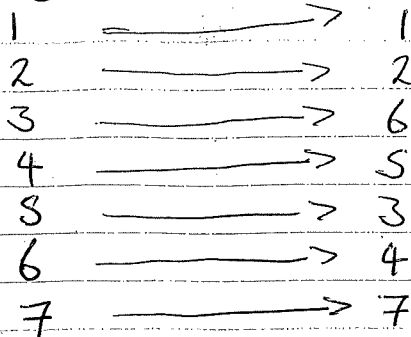

(View when looking into the plug.)

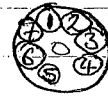

Firewire plug

to

Round plug

Camerasend

check numbers in plug

* Will need to be continuity tested as colours do not always follow the same.

* In some cables pins 2 and 7 are connected

* Pins 3, 4, 5, 6 are usually Red or Green or Orange or Blue (not always in that order)

* Be careful not to damage the firewire plug when continuity testing

* To remove pins out of round plug you can use a 1mm diameter jewellers screwdriver to carefully push the pin out

* Be careful when soldering to not use too much heat as it will melt the wires
